

# **Examining the impact of emergency aid at Dallas College**

## **Web Appendices**

June 2022

TABLE 1 | ADJUSTED IMPACTS OF EMERGENCY AID RECEIPT ON ACADEMIC OUTCOMES, BY SEMESTER AND APPLICATION TIMING

Category	Submission Date				Decision Date			
	Treatment		Control		Treatment		Control	
	Mean	SE	Mean	SE	Mean	SE	Mean	SE
<b>Fall 2020</b>								
Average GPA	2.93	0.07	2.74	0.14	2.93	0.07	2.74	0.14
Average Credits Attained	9.16	0.28	8.23	0.56	9.16	0.28	8.23	0.56
Degree Completion or Enrollment in Subsequent Term	0.84	0.02	0.87	0.04	0.84	0.02	0.87	0.04
<b>Spring 2021</b>								
Average GPA	2.27	0.09	2.30	0.18	2.27	0.09	2.30	0.18
Average Credits Attained	7.01	0.33	6.73	0.66	7.01	0.33	6.73	0.66
Degree Completion or Enrollment in Subsequent Term	0.63	0.03	0.59	0.06	0.63	0.03	0.59	0.06

Source | Outcome and student characteristic data from Dallas College administrative database while emergency aid application data from Edquity.

Notes | Means and standard errors represent linear regression while proportions and associated standard errors represent logistic regression, each controlled for either application submission or decision date fixed effects and student characteristics: age, race and ethnicity, US citizenship, and sexual identity. Submission date is based on the date that the student applied for emergency aid through the Edquity application. Decision date is based on the date on which the student's application for emergency aid was adjudicated by Edquity, determining if the student received aid.
